

Fusion™ Plus Dual Gel

Heat-Dispersal Rating: **500 W/mK** (particle level)

Fusion™ Plus Dual Gel is Kayfoam's high-density, pressure-relieving Visco Elastic material infused with two complementary Gel additives. Red Gel acts as a heat conductor that helps move excess heat. Blue Gel acts as a heat sink to manage the excess heat. Coupled with enhanced "non-sink" support properties for easier movement and enhanced support where you need it most.

- Kayfoam Visco Elastic is an advanced pressure-relieving material designed to enhance sleep comfort.
- Dual Gel is an effective heat-dispersal additive to help reduce over-heating.
- Dual Gel acts as a heat sink to absorb and manage excess heat.
- Gel beads cluster together under compression to improve support properties, reducing excessive sinking and helping movement.
- Durable Visco Elastic formulation maintains high resilience, recovery, and support over years of use.

Heat Dispersal

Thermal additive disperses excess heat

Bedding Applications: Block | Sheet | Rolled | Sub-assembled | Fully finished
