

Fusion™ Gel

Up to 7x Thermal Capacity

Fusion™ Gel is Kayfoam's high-density, pressure-relieving Visco Elastic material infused with Gel bead technology. Resulting in improved heat capacity that absorbs and manages excess heat. Coupled with advanced "non-sink" support properties for easier movement and enhanced support where you need it most.

- Kayfoam Visco Elastic is an advanced pressure-relieving material designed to enhance sleep comfort.
- Gel beads enhance thermal capacity for quick and effective management of excess heat.
- Gel beads cluster under compression to improve support properties, which reduce excessive sinking and help movement.
- Durable Visco Elastic formulation maintains high resilience, recovery, and support properties over years of use.

Heat Capacity

Thermal additive absorbs and manages excess heat

Bedding Applications: Block | Sheet | Rolled | Sub-assembled | Fully finished
